

## Handheld Animal Reader

### About H20-F-4-001 Handheld Animal Reader:

The latest edition microchip scanner H20-F-G4 is a kind of portable animal reader that developed by Freevision, catering to the application market of pet's ID and animal identification. This new generation handheld animal ID reader is highly cost-effective and easy to use.

H20-F-G4 microchip reader is light, handy and has high scan-sensitivity. It supports data storage, USB or Bluetooth data transmission.

H20-F-G4 supports all the ISO11784/785 standards of tag reading:

H20-F-G4-001: support ISO11784/785 FDX-B only

H20-F-G4-002: support FDX-A (FECAVA) and ISO11784/785 FDX-B

H20-F-G4-003: support ISO11784/785 FDX-B & HDX

### Features:

- ◆ Support all common ISO11784/785 RFID animal tags;
- ◆ Easy operation, reading with only one button;
- ◆ The display comes with backlight for easy reading in dark environment;
- ◆ Big memory to store up to 8000pcs ID number data;
- ◆ Automatically read the IDs when it is Reading mode, no need to always press the Read button;
- ◆ Standard USB interfaces to connect with computer for data uploading;
- ◆ Color options: White, Black
- ◆ Options: Logo printing

## Specifications of H20-FG4 Series Handheld Reader

working frequency	134.2KHz/125KHz
screen	36x10 OLED
system clock	built-in
buzzer	built-in
data storage	8000 records
power supply	9V
communication mode	USB
continuous working time	1-2 hours
storage temperature	-30°C-65°C
operation temperature	-30°C-50°C
operation humidity	5%~90%
color	Black or White
Package size	17.5*15.5*5cm
G.W.	420g
N.W.	140g
button number	1
indicator light	Yes
reading standard	FDX-A (FECAVA), ISO11784/785 FDX-B & HDX
operation language	English
guarantee	one year
accessories	packing box, USB cable
reading distance	13cm (FDX-B Button ear tag); 8cm (2x12mm FDX-B Microchip)
